Vision of Viora Trade Ltd

- Empowering the Future through Crowdsourcing and Blockchain Innovation
- Viora Trade Ltd. is a financial management company registered in the United Kingdom (UK) on 12th May 2025. The registration number is 16444674. Viora Trade Ltd is committed to revolutionizing digital finance and business ecosystems through an open crowdsourcing model. By leveraging blockchain technology, our goal is to implement at least 30 innovative projects by 2030, ensuring global economic opportunities for our members. Our vision is to create a decentralized and inclusive financial network that empowers individuals and businesses worldwide. Through strategic initiatives like EBN(EBON) Coin, Viora International Visa Card and Viora e-Commerce Platform, we aim to provide secure, transparent, and rewarding financial solutions.

What is Crowdsourcing?

- Crowdsourcing is a process where an organization or an individual gathers ideas, tasks, or funds from the public, usually online platform. It helps solve problems by leveraging the collective efforts of many individuals or groups.
- The core idea behind crowdsourcing is that what may not be possible for one person alone can be accomplished through the small contributions of many. This method has gained popularity in business, technology, research, design, and fundraising.
- One of the biggest advantages of crowdsourcing is that it enables tasks to be completed quickly and efficiently. People with different skills and expertise can contribute their knowledge and experience to solve a specific problem or project. Many startups, NGOs, and large corporations use crowdsourcing to make their work more efficient and productive.
- For example, Wikipedia is a great example of crowdsourcing, where contributors worldwide add and update information. Similarly, crowdfunding platforms like GoFundMe or Kickstarter allow entrepreneurs to raise funds from the public for their projects.

Overall, crowdsourcing is not just a problem-solving strategy but a powerful tool that brings together the collective power of people to create innovative and effective solutions.
